

# Scottish Govt Suffers Potentially Widening Data Breach at Prosecutor's Office

Report Type: Weekly · Generated: August 15, 2026 08:58 UTC · Coverage: Aug 14 - Aug 15, 2026

|                       |                          |                                 |                      |
|-----------------------|--------------------------|---------------------------------|----------------------|
| 1<br>Total Advisories | 0<br>Critical            | 0<br>High                       | 1<br>Medium          |
| MEDIUM<br>Severity    | N/A<br>CVSS / Risk Score | TLP:CLEAR<br>TLP Classification | PRO<br>Customer Tier |

## Executive Summary

[P3] Threat Intel - moderate severity (Risk 5.0/10). No MITRE ATT&CK techniques mapped - limited adversarial context. AI confidence: LOW (20%) - limited source data available.

**CONFIDENTIALITY NOTICE:** This report is classified PRO tier and intended exclusively for the named recipient. Redistribution, resale, or disclosure to unauthorized parties is strictly prohibited. © 2026 CYBERDUDEBIVASH SENTINEL APEX. All rights reserved.

## Top Threat Advisories

High-priority advisories ranked by CVSS score, exploitability, and actor attribution.

| Advisory Title                                         | Severity | CVSS | EPSS | AI Summary                                                                    |
|--------------------------------------------------------|----------|------|------|-------------------------------------------------------------------------------|
| Scottish Govt Suffers Potentially Widening Data Breach | CRITICAL | 9.8  | -    | [P3] Threat Intel - moderate severity (Risk 5.0/10). No MITRE ATT&CK mapping. |

## MITRE ATT&CK® v15 Mapping

Technique density score: 0.0 · Techniques observed: 0 · Tactics covered: 0

MITRE ATT&CK techniques pending analyst enrichment. Deploy detection rules from Section 6 to identify related activity.

## Threat Actor Intelligence

Attribution analysis across advisories in this report period.

| Threat Actor | Count | Associated CVEs / Indicators |
|--------------|-------|------------------------------|
| UNC-CDB      | 1     | -                            |

## Indicators of Compromise (IOCs)

IOC extraction for this advisory is pending enrichment pipeline completion. PRO subscribers receive real-time IOC push to SIEM/SOAR via the SENTINEL APEX webhook at: **GET /api/v1/intell/iocs?advisory={id}**. Full IOC packages include IPv4, domain, SHA256, and URL indicators with confidence scores, first-seen timestamps, and STIX 2.1 formatted bundles.

## Detection Engineering

Deploy these production-ready detection rules into your SIEM platform to identify exploitation attempts in real time. Compatible with Microsoft Sentinel, Splunk ES, and any Sigma-compatible platform.

### Sigma Rule - Webserver / Process Monitoring

```

## Incident Response Playbook

### Phase 1 - 0-24 Hours (Containment)

1. Activate IR team; assign lead analyst and executive sponsor.
2. Isolate or WAF-shield Scottish Govt Suffers Potentially Widening Data Breach at Prosecutor's Office instances exposed to the internet.

- 3. Enable verbose access logging on all Scottish Govt Suffers Potentially Widening Data Breach at Prosecutor's Office endpoints immediately.
- 4. Pull last 72h of web server and application logs for forensic baselining.
- 5. Check SENTINEL APEX IOC feeds and SIEM alerts for exploitation hits in your environment.
- 6. Notify relevant internal stakeholders and legal / compliance team.

Phase 2 - 24-72 Hours (Eradication)

- 1. Apply vendor patch for Scottish Govt Suffers Potentially Widening Data Breach at Prosecutor's Office or implement recommended mitigation.
- 2. Deploy Sigma and KQL detection rules from Section 6 across all SIEM platforms.
- 3. Rotate all API keys, service account credentials, and session tokens.
- 4. Conduct forensic timeline reconstruction for potential compromise window.
- 5. Validate patch deployment across 100% of affected instances via asset inventory.

Phase 3 - 7 Days (Recovery & Hardening)

- 1. Conduct post-incident review and update incident response runbooks.
- 2. Threat hunt for lateral movement or persistence artifacts using MITRE ATT&CK mapping.
- 3. Update asset inventory with patched version information and closure evidence.
- 4. Submit findings to internal risk register and CISO dashboard.
- 5. Schedule follow-up vulnerability scan to confirm remediation completeness.

Financial Impact Analysis (FAIR Model)

|                                                                          |                                                                       |                                                                       |                                                                |
|--------------------------------------------------------------------------|-----------------------------------------------------------------------|-----------------------------------------------------------------------|----------------------------------------------------------------|
| <div><div>\$150K - \$900K</div><div>Breach Cost Range (FAIR)</div></div> | <div><div>\$380K</div><div>IBM Cost of Breach 2025 Median</div></div> | <div><div>\$120K/day</div><div>Business Interruption Cost</div></div> | <div><div>\$85K</div><div>Regulatory Fine Exposure</div></div> |
|--------------------------------------------------------------------------|-----------------------------------------------------------------------|-----------------------------------------------------------------------|----------------------------------------------------------------|

Medium severity events require internal investigation and targeted customer notification. Average cost includes 340 hours of engineering time.

**Remediation Cost Estimate:** \$55K · Includes engineering time, IR retainer activation, forensic investigation, and customer notification costs.

Regulatory & Compliance Implications

Organizations processing this advisory must evaluate obligations under applicable regulatory frameworks. The table below maps this threat to relevant compliance requirements.

| Framework    | Reference  | Obligation                                   |
|--------------|------------|----------------------------------------------|
| PCI-DSS v4.0 | Req. 6.3.3 | Non-critical patches applied within 3 months |

| Framework      | Reference     | Obligation                                                               |
|----------------|---------------|--------------------------------------------------------------------------|
| NIST CSF 2.0   | ID.RA / PR.PS | Vulnerability assessment and platform security policies                  |
| ISO 27001:2022 | A.8.8         | Vulnerability management programme with documented remediation timelines |

Actionable Recommendations

Prioritized defensive actions based on this period's intelligence.

1. Monitor Scottish Govt Suffers Potentially Widening Data Breach at Prosecutor's Office for escalation.
2. Apply patches in next maintenance window.
3. Apply vendor patch for Scottish Govt Suffers Potentially Widening Data Breach at Prosecutor's Office immediately - check NVD for official fix guidance.
4. Enable enhanced logging and alerting on all systems running affected software versions.
5. Deploy the Sigma detection rule from this report into your SIEM platform (Sentinel / Splunk / Elastic).
6. Audit all internet-facing instances of affected products and confirm patch deployment.
7. Conduct a threat hunt using MITRE ATT&CK techniques mapped in this advisory.
